RE: Environmental Product Declaration

To whom it may concern,

This letter confirms with interested parties that WAP Sustainability Consulting and Dupont de Nemours, Inc. have entered into a services agreement to provide Life Cycle Assessment (LCA) & Environmental Production Declaration (EPD) Services for NextGen XPS-ST-100 Styrofoam™ Brand insulation products. WAP Sustainability Consulting is in the final stages of completing the LCA and EPD documents. Dupont de Nemours has engaged UL Verification Services, Inc. to conduct the required third party verification of both the LCAs and EPDs.

Both the LCAs and EPDs will be eligible for point contribution under both LEED V4 and LEED V4.1 MR Credit: Building Product Disclosure and Optimization – Environmental Product Declarations. Additional further optimization assessments may be completed, which are anticipated to show significant reductions in embodied carbon, greenhouse gas values, and other environmental impact categories.

We anticipate that the EPDs will be published during June 2021 and will be available on UL Spot and Dupont's website.

I am happy to discuss the status of these documents with you if you happen to have any questions.

Kind regards,

A handwritten signature in black ink, appearing to read "W. Brad McAllister", with a horizontal line extending to the right.

W. Brad McAllister
